

Final Presentation on

“A Study on Informal Market at the Local Level and the Role of Stakeholders”

PLAN 402: Participatory Planning Workshop

Group 03

Student ID: 1815002, 03, 23, 28, 29

Date: 13 December 2023

Background

The informal sector primarily dominates the overall economy of Bangladesh, which constitutes around **75% of employment in urban areas** (BBS, 2023).

Lack of job opportunities in rural areas and **rural urban migration** have **induced rapid growth of informal markets** in Dhaka City over the years.

Informal markets are the main distribution channel for a large variety of products like fruits, vegetables, readymade garments, shoes, household gadgets, toys, stationery, newspapers, and magazines and so on for daily consumption (Islam et al.,2019).

According to recent statistics, the informal sector contributes **approximately 40% of the country's GDP** and employs a substantial portion of the workforce, yet it remains largely unregulated and underserved (BBS,2023).

Informal vendors also face server problems due to a lack of legal protection and social and employment benefits, operating under inhospitable conditions, without basic facilities coupled with the fear of harassment and damage to their goods (Husain et al.,2019).

In order to fully comprehend **the nature, dimension, and issues of these informal markets** as well as identify areas that could benefit from **improvement from the viewpoint of relevant stakeholders**, more **research is required at the local level**.

□ Research Gap

In the context of Bangladesh, existing literature provides **general insights into the street vending activities and related problems** but lacks a detailed analysis of the spatial and temporal characteristics of the informal markets **at the local level**, the specific challenges faced by informal businessmen and users within these localized market areas and additionally, the roles and relationships of stakeholders within these markets have not been thoroughly explored.

□ Scope of the Study

- This study will give insights about the spatial distribution of vendors in an informal markets, and investigating temporal trends, such as peak hours of activity and seasonal variations in that market.
- The study will identify and analyze the diverse type of problems faced by informal businessmen and users within the market through participatory approach.
- By examining the relationships and role of stakeholders, the study aims to reveal how stakeholders influence the functioning of informal markets, whether as enablers or obstacles.
- The recommendation provided in this study can help local government institutions to perform their roles efficiently and can assist the vendors.
- By incorporating the perspectives and insights of those involved in these markets, the research will provide a comprehensive analysis that reflects the realities on the ground.

□ Limitation of the Study

The information regarding the amount extortion was obtained from only one individual, as other vendors refrained from providing details due to fear.

Due to the irregular attendance of the only one female vendor in the informal market, we were unable to include her in some of the Focus Group Discussion (FGD) sessions.

The vendors requested us not to disclose the information regarding the extortion to the local political leaders. Therefore, we refrained from directly approaching the leaders.

The informal vendors were unable to give adequate time to conduct participatory research due to their busy schedule.

Literature Review

Objective 1 : To understand the spatial and temporal extent of informal markets

Foreign Context		
Location	Findings	Citation
India	Identified hazardous areas while setting up food vending carts in relation to food spaces and infrastructure provision	Ahmed et al., 2019
Old Beijing City	- When Longfu Temple morning market gets closed. Instead, the vendors continued vending in more marginalized “urban crack” areas. - To make greater use of the narrow alleys, the majority of sellers operate freight tricycles and minivans. - The managers set the operating hours of the Longfu Temple morning market from 6:00 a.m. to 9:00 a.m	Lie et al., 2018
Thailand	Sellers start their business in the late afternoon or early evening and leaves for home at midnight	Trup, 2015

Bangladesh Context	
Findings	Citation
- Informal markets are established both on the footpaths and in the carriage ways of roads. - A linear pattern is formed by the vendors of those markets along the major roads - Similar to a small bazar, are found beside the school and mosque	Rahman, 2019
- Informal market tend to choose a more unused neutral space between footpath and main road drain or other unused corners. - An average of 27.83 sq. ft. area on an average to accommodate their main structure for business	Haque, 2014

Objective 2 : To identify and analyze the problems faced by informal businessmen

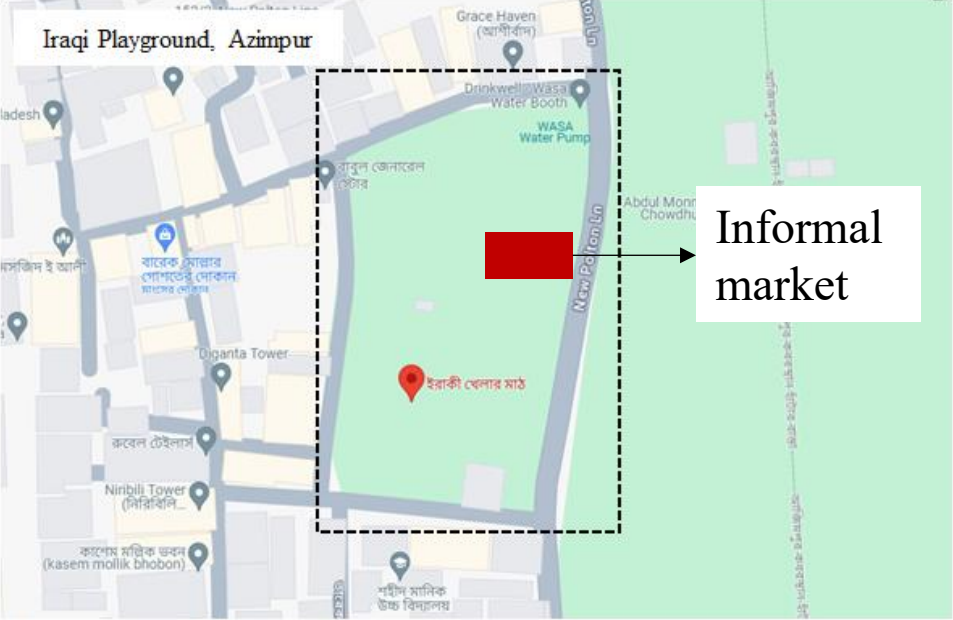

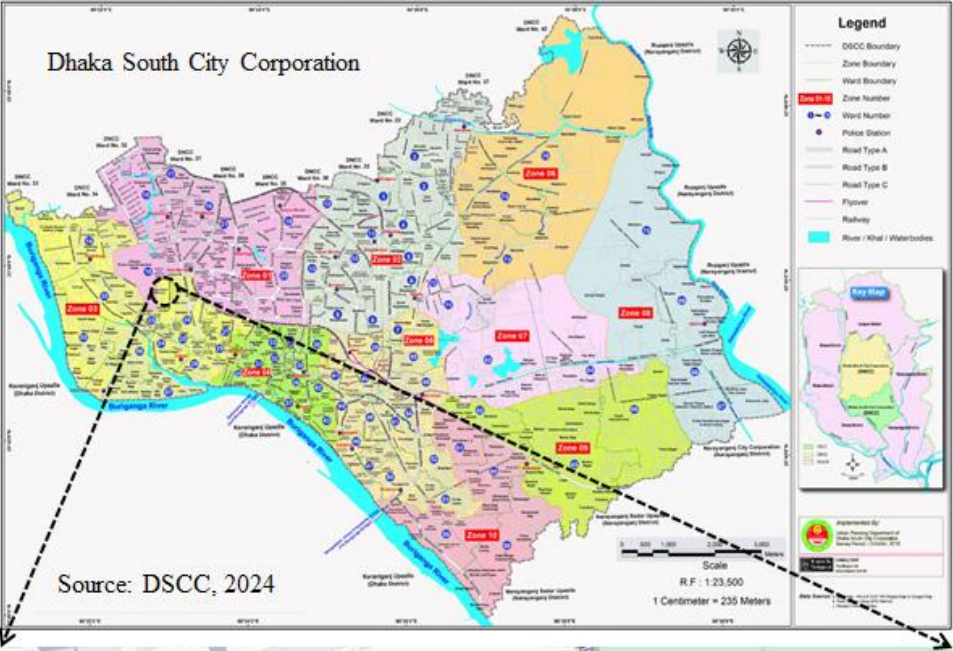

Foreign Context			Bangladesh Context	
Location	Findings	Citation	Findings	Citation
European countries	- Regulatory constraints - Gentrification and urban development - Sanitation and infrastructure deficiencies.	Mörtenböck and Mooshammer, 2009; Sekhani et al. 2019; Walsh, 2010; Bahendwa, 2010; Ayeh, 2006	- Lack of proper infrastructure, such as storage facilities, shelters and designated areas for waste disposal, conflicts with traffic and pedestrians - Eviction threat. - The unavailability of recreational spaces for communities, - During peak times, markets can become overcrowded, affecting the overall experience for vendors and consumers - Water-logging and sanitation problem - Limited access to formal financial services.	Haque, 1986; Haque, 2014; Alam and Khan, 2018;
India	- Obtaining licenses - Police Harrassment. - Lack of infrastructures and services. - Weather Condition and lack of storage facilities. - Long hour of work without rest	Saha, 2016; Sekhani, 2019; Jain and Singh, 2019; Panwar, 2015		
Nigeria	- Poor Waste Management - Inadequate Facilities for Vendors and Customers.	Okafor and Nwankwo, 2017		

Objective 03: To explore the relationship and role of stakeholders in informal market at local level

Foreign Context			Bangladesh Context	
Location	Findings	Citation	Findings	Citation
Vietnam	Frequently targeted by authorities in public spaces, vendors face fines, bribes, and ridicule for appearing "out of place" or "non-modern"	Turner and Schoenberger, 2021	- The political dynamics of informal commerce in Dhaka city, is the necessity for good relations with the lineman who is accountable to the local political leaders - Police presence often involves direct extortion - Sudden demolitions or evacuations without prior notice by City Corporation for reconstruction or widening of the roads or footpaths, regular or periodic actions of relevant law enforcing authority, pressure from the local residents, sports or matches in Sher-E-Bangla National Cricket Stadium	Haque, 2014; Rahman et al. 2021
Beijing City	To extend the operations without direct conflict with security guards, vendors pretend to pack and unpack goods when approached, effectively prolonging their selling time within the confines of the regulations	Lie et al., 2018		
Mexico	- Vendor organizations serve as negotiators to navigate bureaucracy and as managers of social assets, controlling access and resolving conflicts. - Social capital, family, friends, etc., play an important role among street vendors	Pema, 1999		

Foreign Context

Country	Initiatives	Remarks
India	National Policy on Urban Street Vendor, 2009 Street Vendors Act, 2014	• Provides a registration process and a Town Vending Committee to operate the management and guiding the Informal commercial street vending. • Allows the street vendors to be registered and permitted in operating the business in a time sharing model. • Protection legitimate street vendors from harassment by police and civic authorities
Kenya	Kenya National Alliance of Street Vendors and Informal Traders (KENASVIT)	• Strengthening institutions and program management by supporting institutional strengthening and capacity building. • Enhances tenure security by supporting systematization • Invest in infrastructure and service delivery
China	Hukou System	• Government provides ‘Token legalization’ for a specific time period of the informal market
Mexico	Street Commerce Reordering Program	• Helping street vendors make the transition from the streets into more established types of markets called Plazas • Tighter control by city government through the issuance of licenses to street vendors to practice their activity
Peru	De Soto’s approach of 'Extra legalization'	• The renowned Peruvian Economist Hernando De Soto suggested a new perspective to adopt the so called 'illegal' as well as Informal sector as extra legal sector. At that time 56% of all business in Peru were carried out in the “extralegal” sector

Overview Of The Informal Market

Location	Iraqi Playground, New Paltan Lane, Azimpur
Type of Market	Informal
Operation Hours	07.30AM-01.00PM
Frequency	Regular
Number of Vendors	22
Type of Products Sold	Vegetables, Fruits, Fish, Chicken, Spices, Cloths, Utensils
Structures Used for Business	Wooden Cart, Van, Mats Made of Polythene Sheets
Extension of the Market	35m at the northeast side of the playground

Source: Author, 2024

Objective 01: To understand the spatial and temporal extent of informal markets at the local level

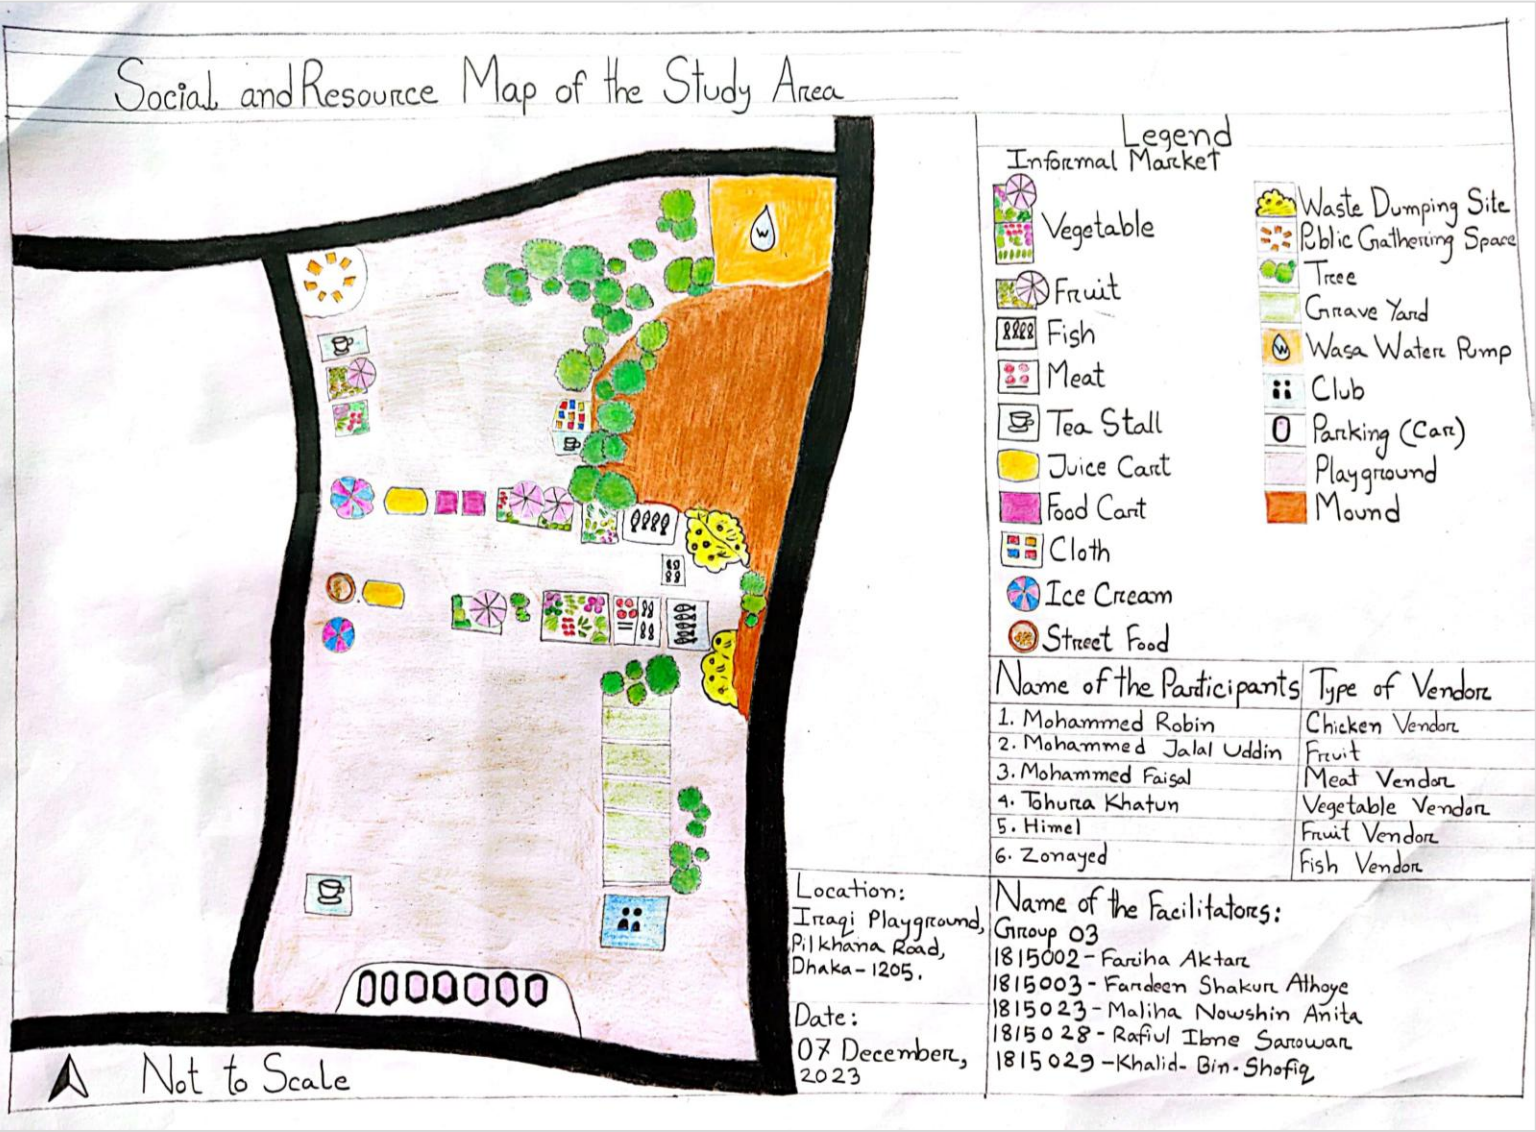

Application of Space Related PRA Tools to Understand Spatial Extent

PRA tools	Date	Time	Purpose
Social Resource Map	7 December 2023	11:30 AM-12:30 PM	To identify the existing social infrastructures, resources and facilities at the site
Natural Resource Map	7 December 2023	11:30 AM-12:30 PM	To identify the exiting natural resources and overall environmental condition at the site
Transect Walk	11 December 2023	12:00 PM – 1:00 PM	To depict a cross sectional view of the study area and identify the key problems and opportunities at the site

Application of Time Related PRA Tools to Understand Temporal Extent

PRA tools	Date	Time	Purpose
Historical Timeline	January 5, 2024	02.30 PM - 04.00 PM	To explores the temporal dimension from historical perspective and the chronology of events as recalled by local people
Seasonal, Weekly and Occasional Diagram			To identify the variation in informal activities across the seasons/weeks/occasions over the years.
Daily Activities Schedule			To identify daily routine pattern of informal vendors and distribution of workloads throughout the day.

Physical and Social Resources of the Study Area

List of Existing Social Infrastructure

Playground

WASA Water Pump

Grave Yard

Club

Social Gathering Space

Car Parking

Waste Dumping Site

- No infrastructure to support **electricity** supply
- Poor drainage**
- Lack of **sanitation** facilities
- No storage** facility
- No dustbin** for waste dumping

Natural Resources of the Study Area

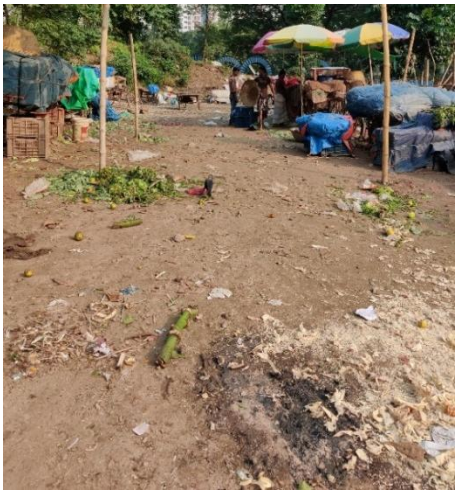

Source: Authors,2023

- The area is mostly **flat with silty sand soil**
- Vegetation** on a raised mound, and several tree species nearby

Plain Land with Silty Soil

Elevated Land

Source: Field Survey,2023

Vegetation on the Mound

Evolution of the Informal Market: A Historical Perspective

Timeline	Incidence	Remarks
1950	Establishment of Iraqi Graveyard , Area: 3 Acres along with playground, owned by Iraqi association	Association claims that local people are trying to occupy it.
1996-1998	Beginning of informal activity with only one vendor.	Didn't employ any shading mechanism as such umbrella to provide shade during adverse weather
2004	Waterlogging during rainy-season ; Utilizing infrastructures such as (vans, carts) to keep goods.	Protecting against water logging and allowed easy movement of goods
2004-2011	Gradual filling of a pond located at the corner of the playground	
2014-2016	Construction of new buildings and newly developed residential area. Creation of the high mound by dumping earth from the construction site.	Vendors are benefitted from increased number of customers.
2016	Instalment of deep-tube well by WASA in the north-east part of the playground.	Used by vendors for drinking water
2017	Started using umbrella above the vending carts	Umbrellas are being used to manage the rough weather conditions
2019	On-going sewage construction by WASA	Usual roads became unsuitable for use.
2023	Ooccurrence of issues namely eviction and theft of products , Security Guard has been employed 2 years back	Each vendor pays 20 taka for guard

Variation in Financial Condition Among Vegetable Vendors Seasonally

Season Months	 Winter (Mid December – Mid February)	 Spring (Mid February – Mid April)	 Summer (Mid April – Mid June)	 Monsoon (Mid June – Mid August)	 Autumn and Late Autumn (Mid August – Mid December)
Sale Volume	●●●●●	●●●●	●●●	●●	●●●
Availability of Wholesale goods	    	   	   	 	  
Income	    	   	  	 	 
Savings	   	  	 		
Food Security	    	   	  	 	 
Price Fluctuation		 	 	  	 
Satisfaction	    	   	 		 
Participants: Jalal Uddin, Johurul Islam, Shahid, Shojib, Nurul Islam, Saifullah Facilitator: Fariha, Athoye, Anita, Khalid, Rafiul Date: 5 January, 2024					

- ✓ Sales volume increases in winter and spring because of higher vegetable production.
- ✓ In winter and spring, the market price of vegetables remains comparatively stable. The overall financial situation of the vegetable vendors remains comparatively good due to increased income and savings.
- ✓ Satisfaction level is higher in the winter and spring. But the sales volume decreases after the summer.

Variation in Financial Condition Among Fruit Vendors Seasonally

Season Months	 Winter (Mid December – Mid February)	 Spring (Mid February – Mid April)	 Summer (Mid April – Mid June)	 Monsoon (Mid June – Mid August)	 Autumn and Late Autumn (Mid August – Mid December)

- ✓ In winter, sales decrease due to lower production of seasonal fruits and decrease in income and savings.
 - ✓ During monsoons, heavy rainfall and flooding hamper the production of fruits. Sale volume is the lowest.
 - ✓ Customers dissatisfaction due to price escalation in monsoon
 - ✓ During monsoon, the overall financial situation of the vendors remains poor. In autumn, the vendors have a moderate sale volume and income.

Variation in Financial Condition Among **Fish Vendors** Seasonally

Season Months	 Winter (Mid December – Mid February)	 Spring (Mid February – Mid April)	 Summer (Mid April – Mid June)	 Monsoon (Mid June – Mid August)	 Autumn and Late Autumn (Mid August – Mid December)
Sale Volume	●	● ●	● ● ●	● ● ● ● ●	● ● ●

Date: 5 January, 2024					

- ✓ **Sale volume** of fish vendors **increases in monsoon** due to higher availability of freshwater fish species
- ✓ **More customers** for their affordable prices and **abundance of fish** during the monsoon.
- ✓ **Satisfaction level is higher** in the monsoon, depending on their sales. Their sales volume decreases after autumn, especially in September.
- ✓ **In winter**, the **availability of freshwater fish is less**, and the market price tends to be higher.

Temporal Trends of Informal Activity: Seasonal Variation			
	Vegetable	Fruit	Fish
Sales Volume	Increases in winter and spring because of higher vegetable production .	In winter, sales volume decreases due to lower production of seasonal fruits During monsoons , heavy rainfall and flooding hamper the production of fruits . Sale volume is the lowest .	Sale volume of fish vendors increases in monsoon due to higher availability of freshwater fish species . Decreases after autumn , especially in September.
Availability of Wholesale Products	Abundant in winter and spring , reduces during monsoon	Abundant in summer and spring , remains moderate in winter, monsoon and autumn	Abundant in monsoon , lowest in winter
Income and Savings	In winter and spring , financial situation of the vegetable vendors remains comparatively good due to increased income and savings .	In winter, decrease in income and savings . Increases in summer .	Increases as more customers for their affordable prices and abundance of fish during the monsoon.
Food Security	Remains good during winter and spring , however reduces in monsoon	Remains good during winter and spring , however reduces in monsoon	Remains good during monsoon and spring , however reduces in winter . Moderate in summer and autumn.
Price Fluctuation	Doesn't fluctuate much in winter , however increases during monsoon	Remains low in summer , but high fluctuation in winter and monsoon	Remains low in monsoon , but high fluctuation in winter .
Satisfaction	Overall satisfaction highest in winter and summer and lowest in monsoon	Satisfaction level is higher in summer due to good condition of above factors.	Satisfaction level is higher in the monsoon, depending on their sales.

Source: Authors, 2024

- ✓ Market condition **deteriorates** most during **monsoon** due to **waterlogging** and **disease outbreak**.
- ✓ **Difficulty in movement** and transferring their goods due to **water logging**.
- ✓ **Heavy rainfall** leads to stagnant water at the site due to **drainage problems**.
- ✓ **Disease outbreaks** and **dengue spread** increase in **monsoons** as a result of water logging. **Unable to conduct business** for days when they are sick.
- ✓ During the **winter**, the vendors can **easily store the goods** without any storage facilities due to the cold temperature.
- ✓ **Difficulty in storing** the goods during the **summer** as products easily rots due to high temperature.

Daily Activity Schedule of the Informal Vendors

	4-5 AM	5-6 AM	6-7 AM	7 AM-2 PM	2-6 PM	6-8 PM	8-12 PM	12-2AM	2-4 AM
									
Men Vendor living nearby	Start for the Iraqi field from wholesale market 	Reach to the field and set up the vending vans 	Finish their breakfast from a tea stall 	Starts to sell the goods and continue till 2PM 	Go to 3 No. gate market 	Continue to sell in 3 No. gate market 	Continue to sell in 3 No. gate market 	Sleep after going back home 	Wake up and starts for wholesale market 
Men Vendor living far away	Start for the Iraqi field from wholesale market 	Reach to the field and set up the vending vans 	Finish their breakfast from a tea stall 	Starts to sell the goods and continue till 2PM 	Go to 3 No. gate market 	Go back to their home 	Sleep 	Sleep 	Wake up and starts for wholesale market 
Women Vendor living far away	Wake up and prepare breakfast and Lunch for the family 	Pick up vegetables from her garden 	Reach to the market by bus and walking 	Starts to sell the goods and continue till 2PM 	Go back to their home 	Cook dinner for family 	Sleep 	Sleep 	Sleep 

- ✓ The daily routines of vendors in the market are impacted by their proximity to the market, challenges related to commuting, and gender roles.
- ✓ The time allotted for sleep is quite short , with male vendors sleeping a maximum of two hours per day.
- ✓ In contrast, male vendors who live farther away have to endure a longer commute to the Iraqi field.
- ✓ Female vendors who live far away have additional domestic responsibilities to attend to as part of their daily routine, such as household chores and meal preparation.

Comparative Analysis in the Trends of Informal Activity

Effect of Weekly Variation on Daily Activity Schedule

- Vendors conduct their business from the early hours of the morning and terminate before afternoon.
- Pattern undergoes a change on Fridays. During Jumma, whereby vendors commence their business activities in the afternoon too.
- They have extra workloads on Fridays.

Effect of Seasonal Variation on Daily Activity Schedule

- Reduced goods at wholesale markets and in number of customers.
- Vendors choose to limit their business operations to shorter durations.
- Daily schedules also changes when vendors get sick due to disease outbreaks in rainy season

Effect of Seasonal and Occasional Variation on Informal Activity

- The sales price and purchasing of goods fluctuates during Ramadan
- When Ramadan coincides with the rainy season, vendors are compelled to purchase products at a higher cost and thereby sell them at an elevated price.

Objective 02: To identify and analyze the problems faced by informal businessmen and users

Application of Space Related PRA Tools to Identify Spatial Dimension of Problems			
PRA tools	Date	Time	Purpose
Transect Walk	11 December 2023	12:00 PM – 1:00 PM	To depict a cross sectional view of the study area and identify the key problems at the site
Application of Relation Related PRA Tools to Understand Temporal Extent			
PRA tools	Date	Time	Purpose
Pair Wise Rankings	January 25, 2024	1:00 PM-2:00 PM	To identify and prioritize the problems of the informal market from both vendors and customers’ perspective
Cause and Effect Diagram	January 26, 2024	2:00 PM – 3:00 PM	To explore the inherent causes of the identified problems and their effect on the informal activities

Spatial Dimension of Problems of the Informal Market

Features						
1. Soil type	Silty Sand					
2. Topography	Plain Land					
3. Land Use	Open Space					
4. Activity	Temporary Informal Activities					
5. Type of Informal Activity	Tea Stall	Street Food	Fruit	Vegetable	Fish	Waste Dumping Site
6. Structure Type	Vending Cart	Cart	Mat, Van with umbrella	Van with Umbrella, Mat	Mat	—
7. Land Ownership	Public					
8. Problem	1. Lack of Government Regulation	1. No Significant Observable problem	1. Poor Drainage 2. Open Waste Dumping 3. Lack of Sanitation	1. Poor Drainage 2. Open Waste Dumping 3. Conflict with Players	1. Lack of Cold Storage	1. Open Waste Dumping
10. Coping Mechanism	1. Pays 150/200 tk. from savings		1. Cover water logged Area with Sand 2. Female Vendor uses distant toilet	1. Shift to different area (Pilkhana gate).		
11. Opportunities	1. Good interaction with local people 2. Vibrant informal economy 3. No conflict with road users					

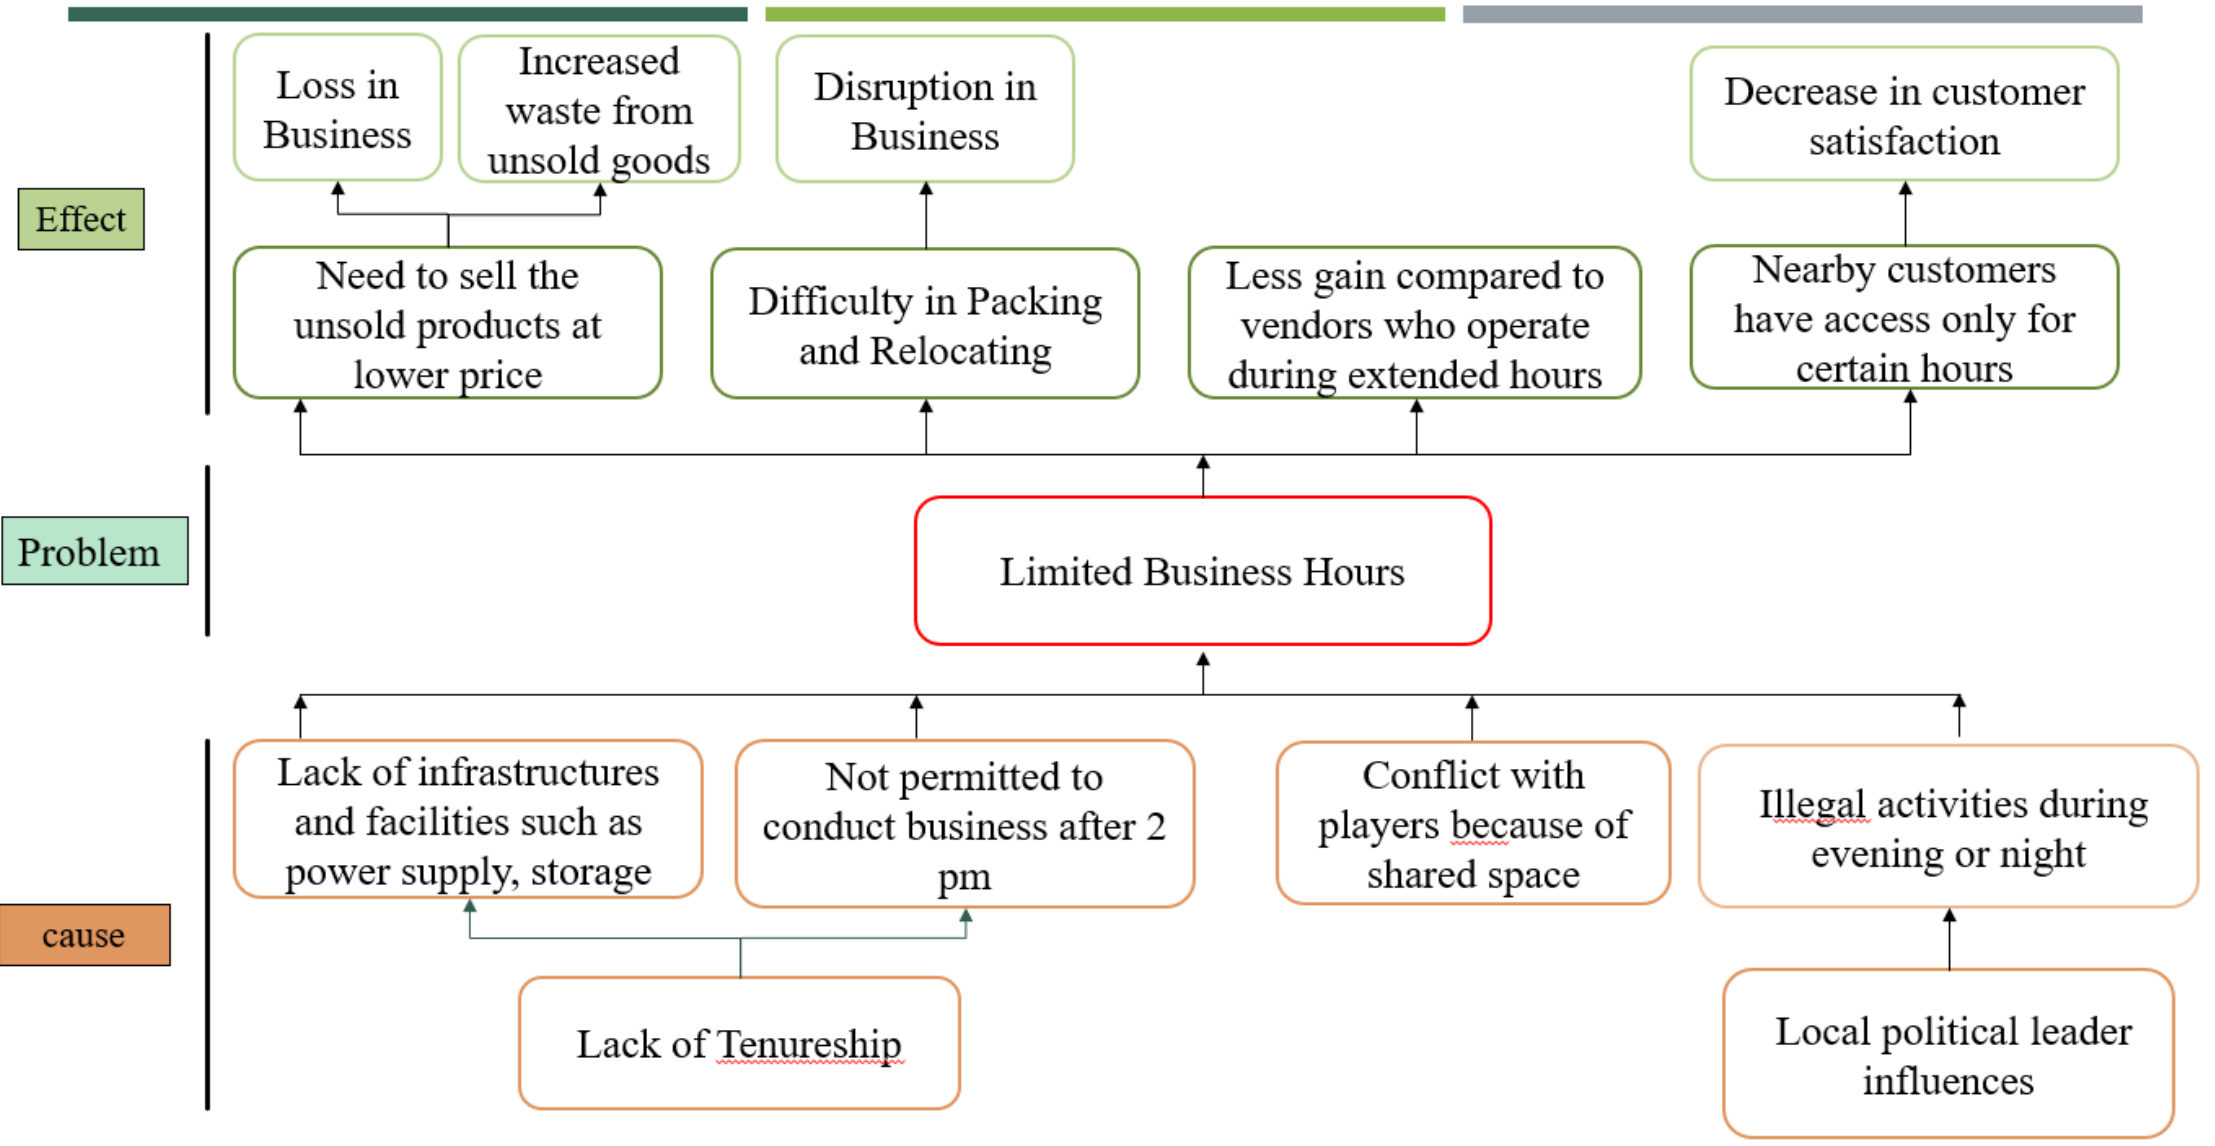

Problem Identification and Ranking: Informal Businessmen Perspective

Problems	Lack of Sanitation (S)	Water logging (W)	Limited Business hours (L)	Mugging (M)	Lack of Electricity (E)	Frequency	Rank
Lack of Sanitation (S)		S	L	M	S	2	3
Water logging (W)			L	M	W	1	4

Objective 02: To explore the relationship and role of stakeholders in informal market at local level

Application of Relation Related PRA Tools to Understand Temporal Extent

PRA tools	Date	Time	Purpose
Venn Diagram	January 25, 2024	1:00 PM-2:00 PM	To identify internal and external stakeholders associated with the informal market, their influence and interaction
Process Mapping			To identify the role of different stakeholders in the management process and activities associated with the informat market

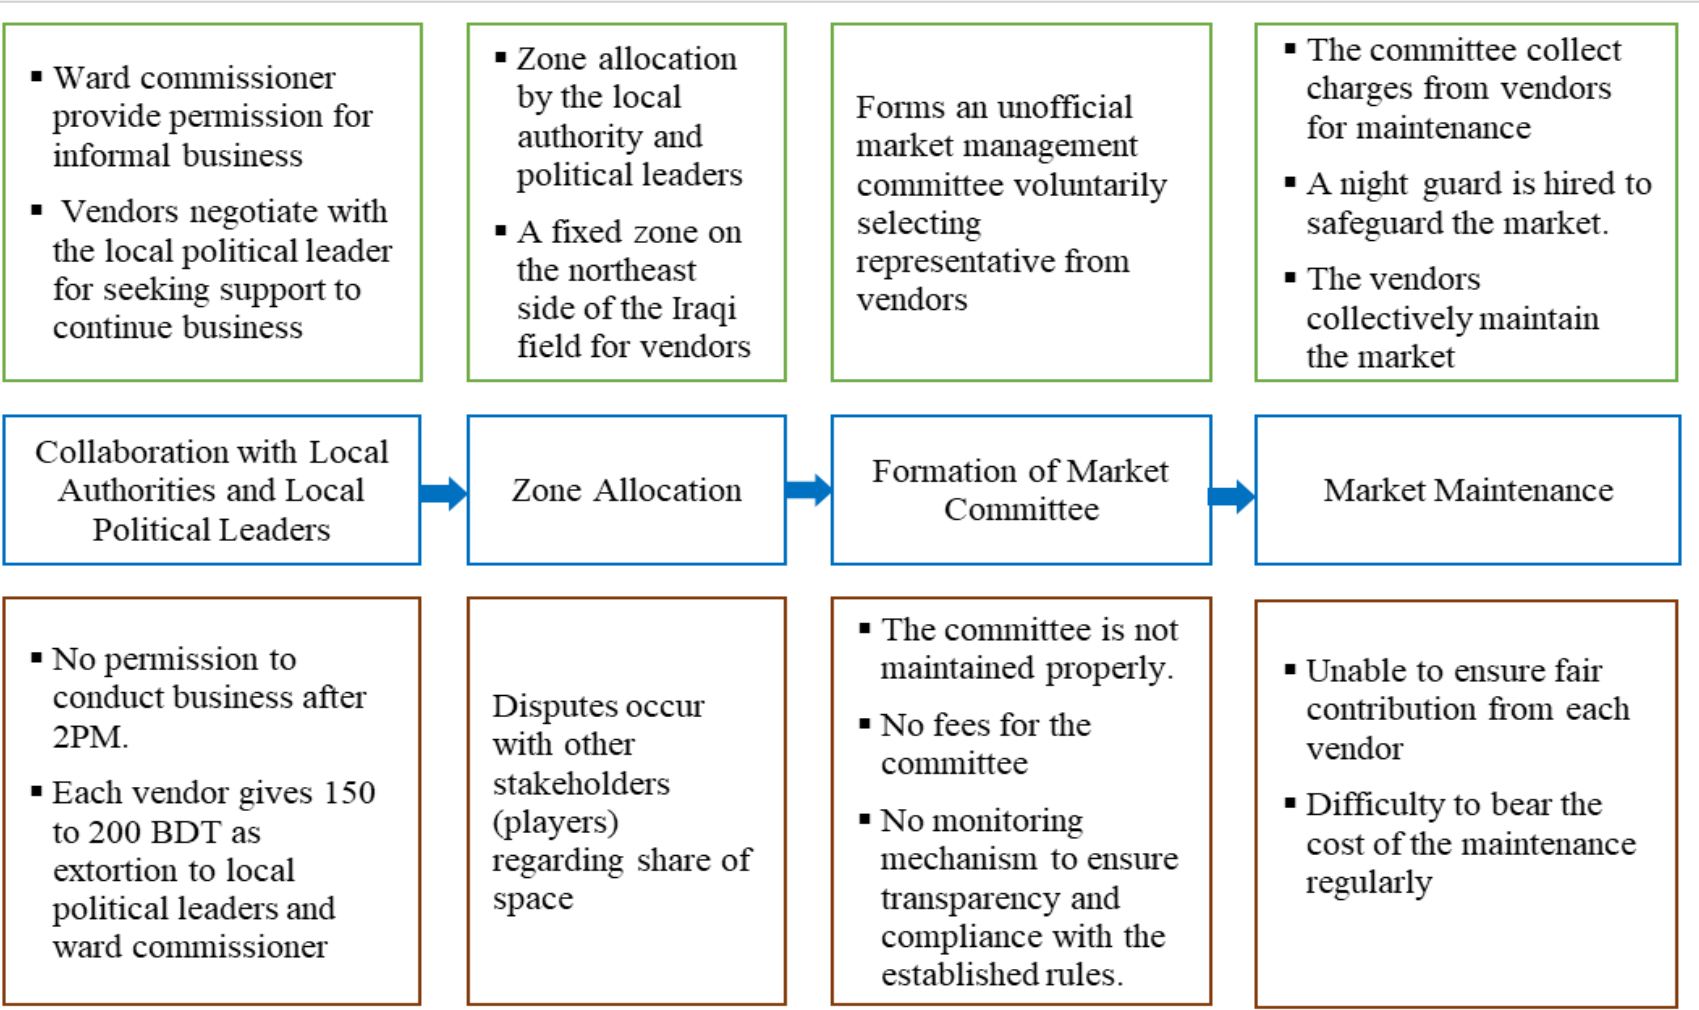

Source: Authors, 2024

Relationship Among Stakeholders: **Influence-Interaction**

Role of Stakeholders in Different Processes of Informal Market

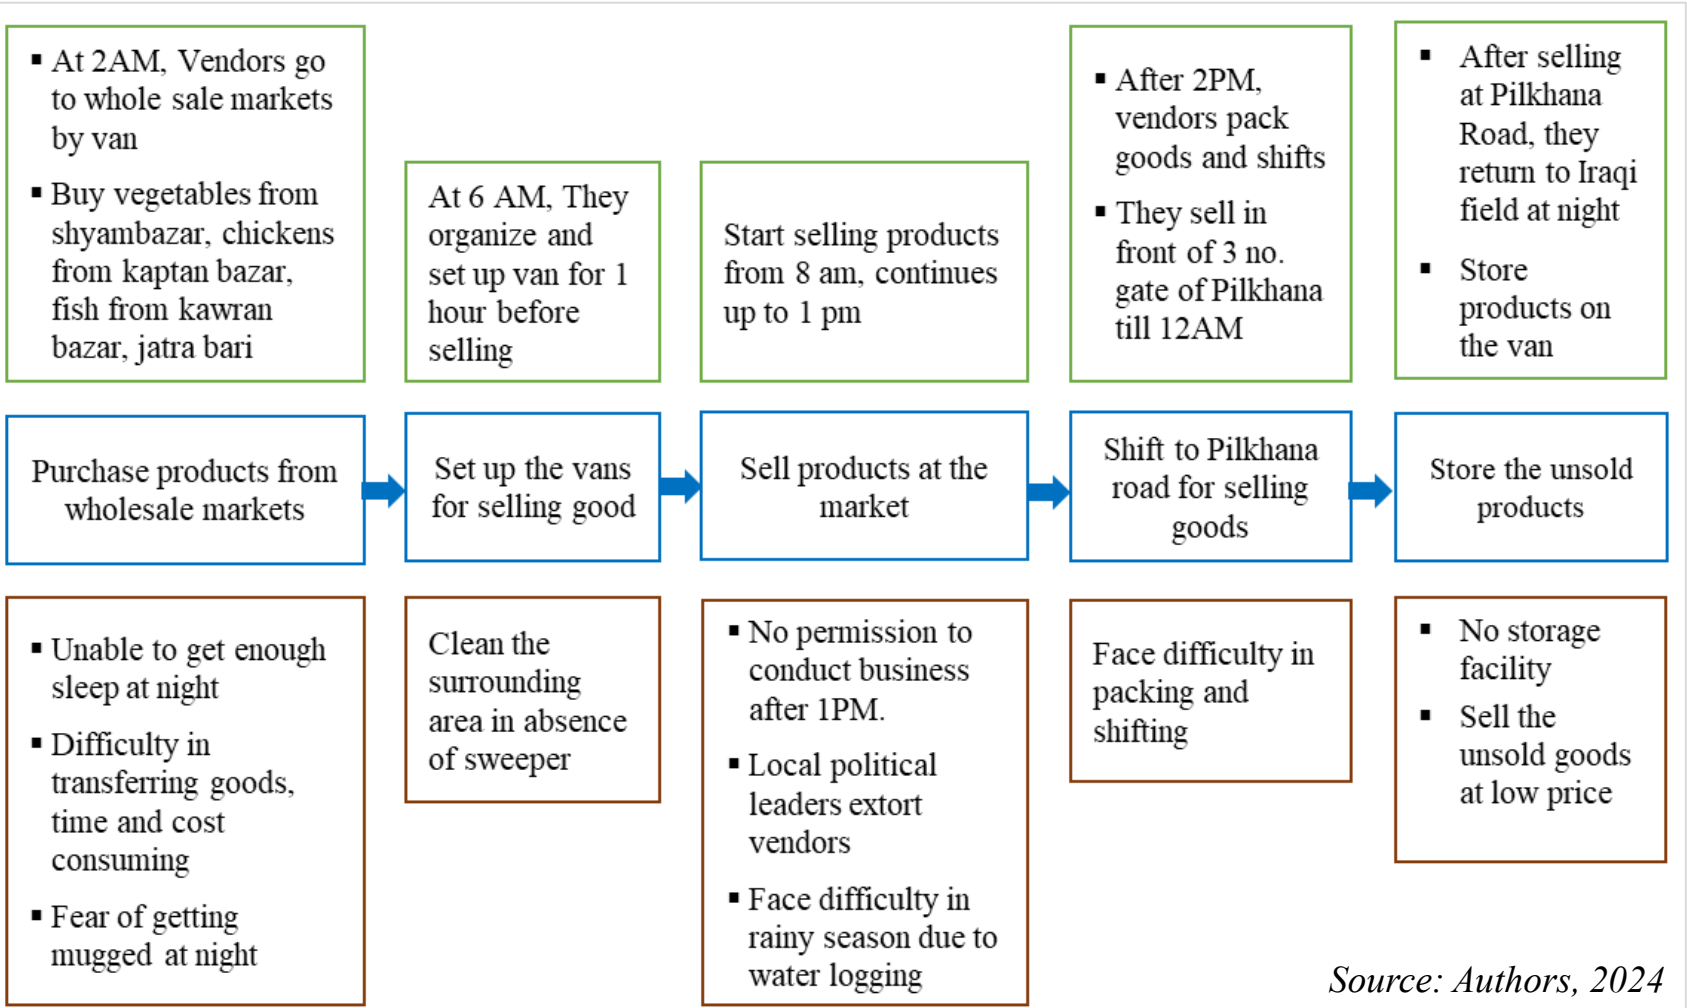

1. Market Management

Stakeholders Role
Ward Commissioner- Permission for Informal Activity
Local Political Leaders- Negotiation to continue business

Role of Stakeholders in Different Processes of Informal Market

2. Purchase and Sell of Wholesale Products

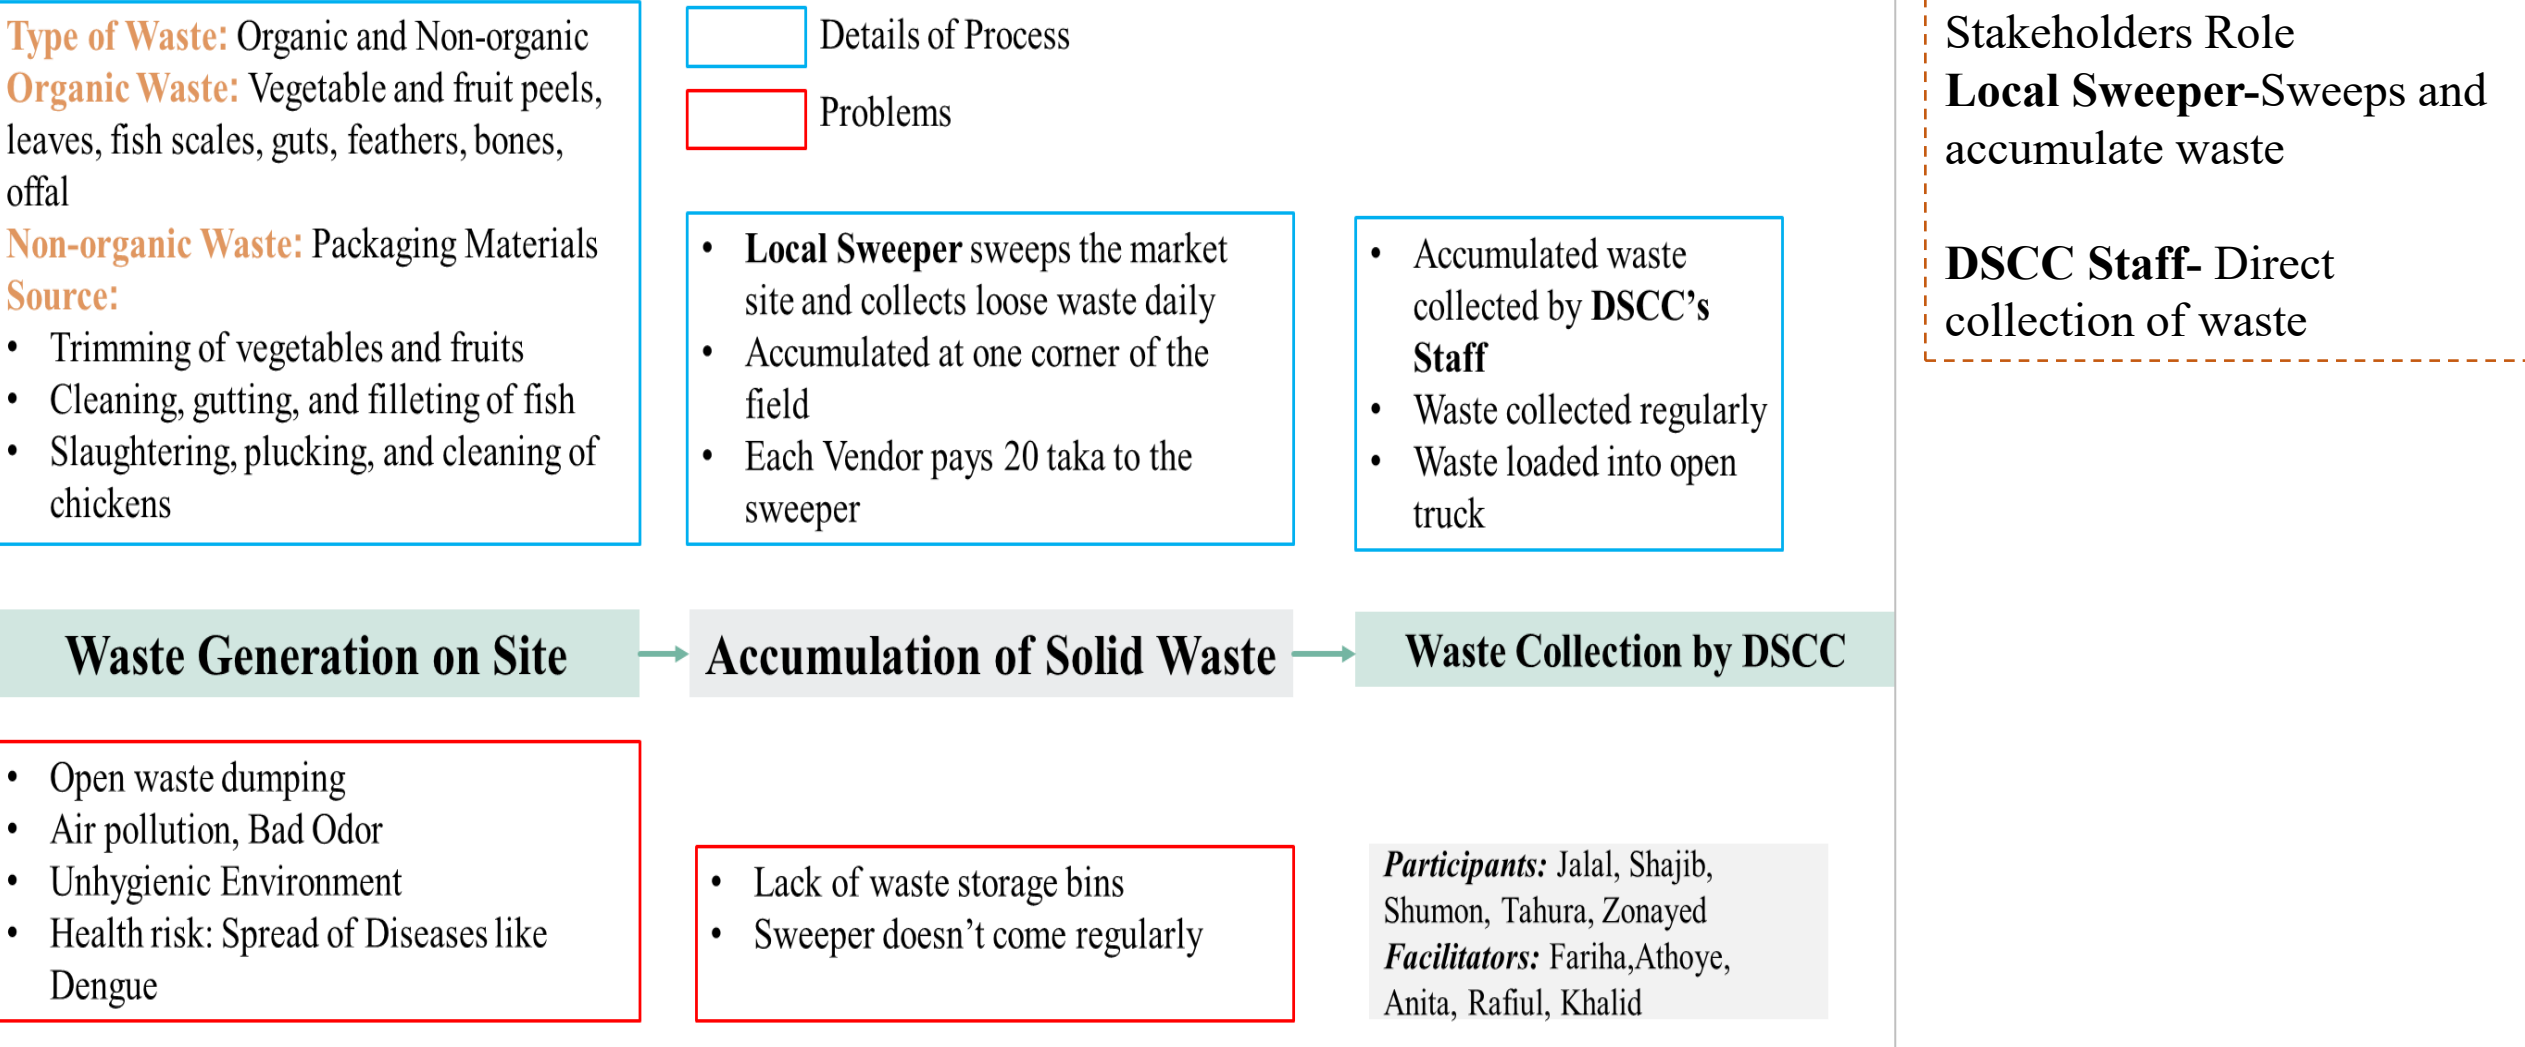

Stakeholders Role
Wholesale Markets- Purchase Products
Local Political Leaders- Extortion of Money

Source: Authors, 2024

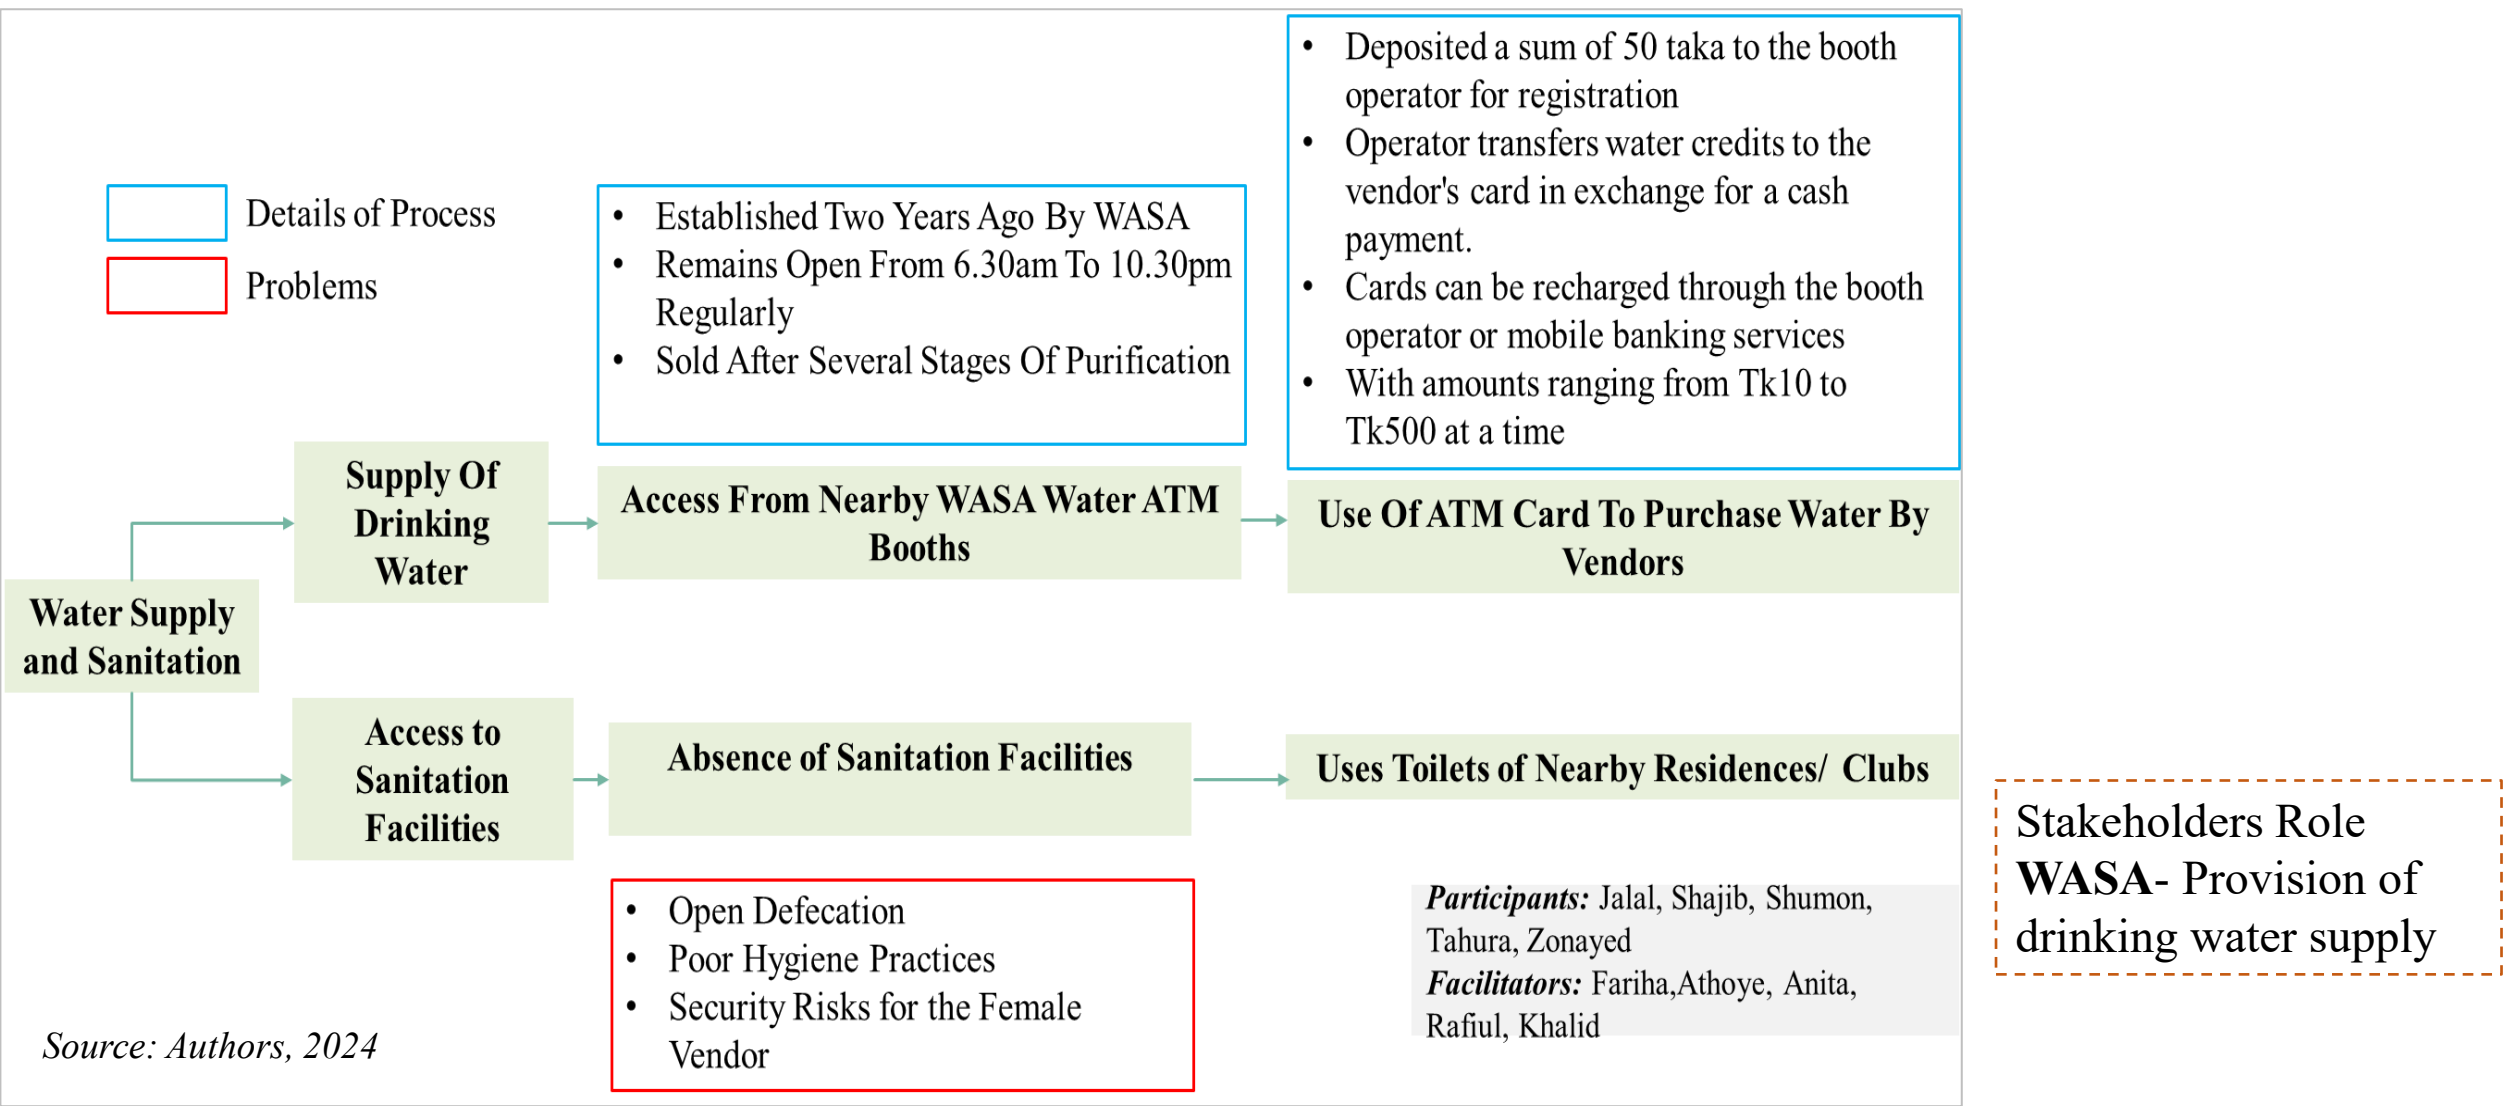

Role of Stakeholders in Different Processes of Informal Market

3. Solid Waste Management

Role of Stakeholders in Different Processes of Informal Market

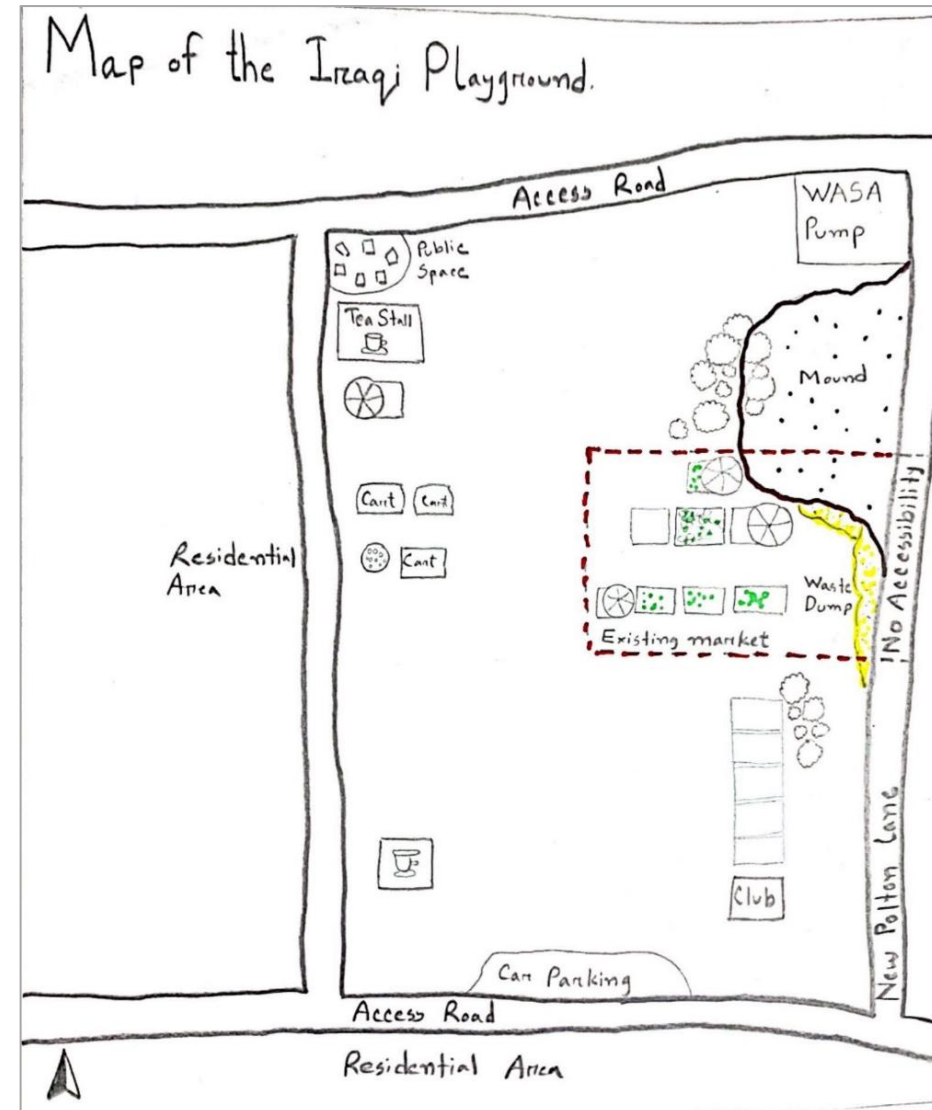

4. Water Supply and Sanitation Facilities

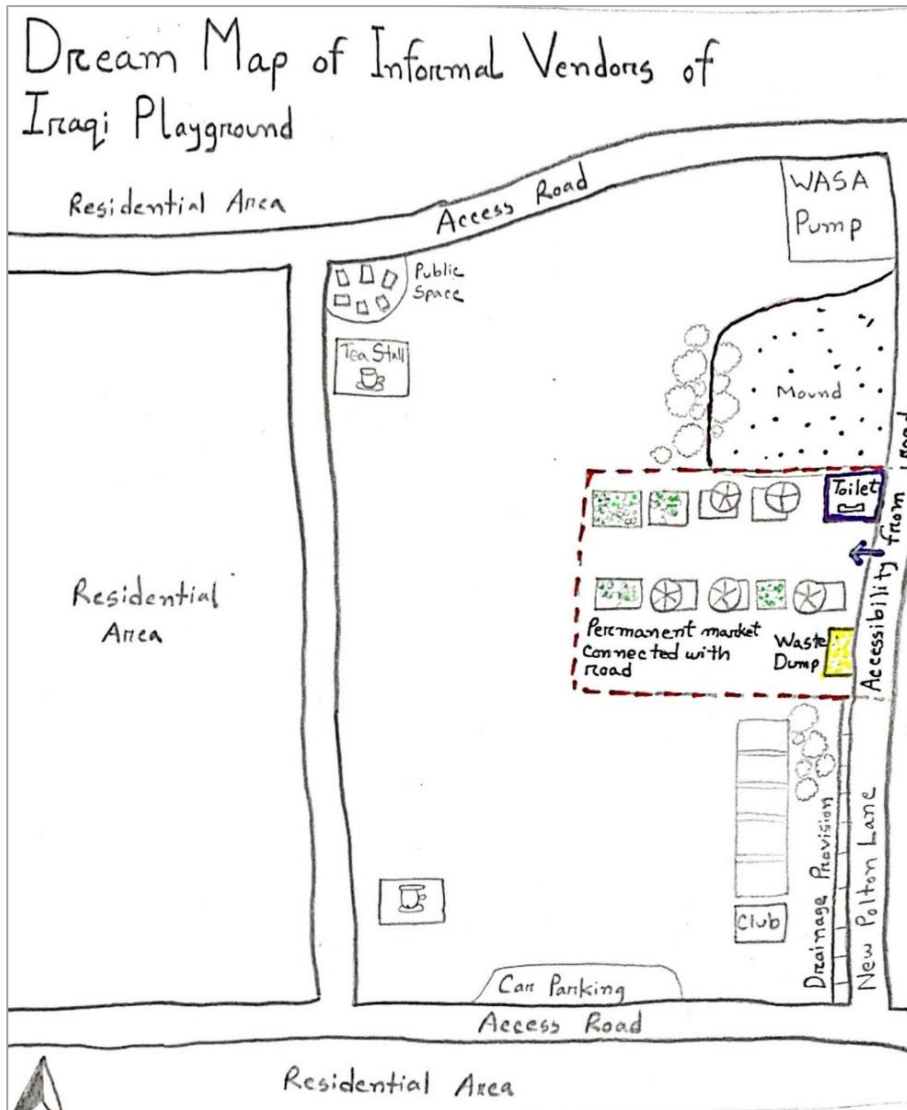

Discrepancies Observed in Stakeholders Response

	Informal Vendors	Ward Commission office	Police
Extortion	The vendors assert that they are obligated to pay daily extortion fees to certain local leaders purporting to represent the Ward Commission office.	The Ward Commission office claims that they have granted permission to vendors to operate their business in the Iraqi field and explicitly state that no extortion fee is required.	
Anti-social activities	The vendors maintain that they refrain from engaging in any anti-social activities in the Iraqi field. However, despite their claims, the local police have doubt on the vendors and are making efforts to evict them.		Local police have a perception that vendors are involved in the anti-social activities of the Iraqi field in the evening.

Existing Situation of the Informal Market: Problem Map

Vendors Vision: Dream Map

Problem Map

- No permanent market structure
- Lack of Sanitation facilities and waste collection bins
- No visibility from secondary road
- Lack of drainage facilities

Dream Map

- Permanent market structure
- Sanitation facilities waste collection bins
- Better roads and drainage.

Prospects and Limitations

INTERNAL	Strength Location: Free From Overcrowding And Congestion Of Road Side Informal Activities Diverse Customers: Customers From Surrounding Households, Families And Children Seeking Recreational Activities. Proximity To Wasa Pump: Convenient And Reliable Source Of Drinking Water Waste Accumulation: Regular Cleaning By Local Sweeper Security Measures: Night Guard Hired by the Vendors Ensure Safety and Security	Weakness Extortion: Impact on their profitability. Limited Business Hours: Disruption in Business and Hassle in Relocation Space Conflict: Negative Interaction Between Players And Vendors Lack of Utility Facilities: Lack of Sanitation Facilities, Electricity and Drainage Water Logging: Reduction in number of customers Open Dumping of Waste: Lack of Waste Collection Bins
	Opportunity Active Involvement of DSCC in Waste Collection Linkage Between Ward Commissioner and the Informal Vendors	Threat Eviction: Threat From Local Polices Which Poses A Risk To The Stability Of The Market. Anti-social Activities: Perception That Vendors Are Involved Harms The Market's Reputation, Stability Of Their Business.

➡ Major Findings

1. Locational Advantage and Disadvantage of the Informal Market

Advantage

- ☐ Diverse customers from the nearby households
- ☐ No issues of overcrowding, congestion and conflicts with pedestrians

Disadvantage

- ☐ Conflict about space on the playground
- ☐ Unable to attract customers outside the residential community
- ☐ No direct access and visibility from adjacent secondary road, new polton lane

2. Availability of Infrastructures

- ☐ The vendors have access to water supply through WASA water pump.
- ☐ There is lack of sanitation facility, proper drainage system, storage facilities, dustbin for waste disposal.

3. Market Management and Vendors' Right to Space

- ☐ The vendors have to collaborate with the local political leaders, local authority and ward commissioner to continue their business.
- ☐ The vendors maintain the market collectively without any official management committee
- ☐ Having no legal right to place, informal vendors encounter issues which include extortion, eviction, conflict regarding space, and limited business hours.

Major Findings

4. Temporal Trends of Informal Activity

- ❑ Seasonal variations significantly impact the financial situation of vegetable, fruit, and fish vendors in the market, with **increased sales volume for vegetables in winter** and spring, **fruits in summer**, and fish during the monsoon season.
- ❑ Weekly variation is observed on **Friday being a peak day for sales** due to nearby residents purchasing necessary goods, and increased sales during sports events scheduled on Fridays and Saturdays.
- ❑ Occasions such as **Pohela Boishakh, Eid-ul-Azha, and Ramadan influence product demands and prices**, with fish sales rising during Pohela Boishakh, decreasing during Eid-ul-Azha, and fruit sales spiking during Ramadan.
- ❑ **Daily routines** of vendors, particularly male vendors, **are impacted by their proximity to the market, commuting challenges**, and gender roles, with shorter sleep durations and longer commutes affecting those living farther away.
- ❑ External factors like heavy rainfall, waterlogging and extreme heat impose challenges, affecting market conditions and operations, including **difficulties in storing goods during summer** and **limited business operations during the rainy season**.

5. Waste Management

- ❑ Vendors face challenges in waste management, resorting to open dumping due to the lack of designated disposal spaces, leading to pollution and environmental degradation at the market site.
- ❑ The collected waste is transferred to disposal locations by DSCC waste collectors after local sweeper accumulate the waste, with vendors incurring a daily charge for this waste management service

Major Findings

6. Customers' Perception Regarding the Informal Market

- ❑ Customers **express dissatisfaction with price** hikes in the informal market, attributing it to additional costs related to extortion and market maintenance, particularly during the rainy season when wholesale goods are scarce.
- ❑ **Nearby residents raise concerns** about the informal market disrupting the Iraqi **playground's environment**, affecting children's safety and the overall sound atmosphere due to increased customer movement.
- ❑ The **unclean and polluted environment** resulting from waste generated by the market leads to hygienic issues, impacting customers' perception of the market's cleanliness and overall quality.
- ❑ Informal activities at the site also compromise **residents' sense of security and privacy**, highlighting broader negative impacts on the local community beyond economic concerns.

Recommendation	Relevant Stakeholder	Issues Addressed	Reference of Similar Context
- Setting up a local vending committee in Ward-23 who will represent interests of vendors. - Efforts to help organize them may have to be promoted and financed by the DSCC. Capacity building initiative by Ward Council	- Ward Council - DSCC - Market Committee - Informal Vendors	- Threat of eviction - Anti-social activities - No formal management of market - Communication barrier with decision makers (municipality/city corporation/local government)	- Market traders association in Accra, Ghana worked to educate and mobilize their members around the issue of Occupational Health and Safety and facilitated a series of workshops to strengthen workers' capacities to negotiate with the municipality to demand improved conditions (Chen et al.,2018) - Peña,1999; Kumar,2012; Martínez et al.,2017; Chen et al.,2018; Panwar and Garg,2015 mentioned that globally, organized groups of informal workers have used collective bargaining in order to negotiate improved status with regards to laws and policies, organizational recognition, authorization to vend in public spaces and markets, participation in decision-making, as well as access to social protections and to address evictions and harassment.

Activities of Committee

- Oversee all operations, including price monitoring, maintenance, and development.
- Taking care of licensing applications and regulating the number of available vendors.

Recommendation	Relevant Stakeholder	Issues Addressed	Reference of Similar Context
• Registering the street vendor and ensuring the issuance of an identity card to the vendor after it has been prepared by the municipal authority. • Forwarding of applications for registration of all existing vendors to Ward Councillor's Office by the market committee in fair and transparent manner and thus legalizing the vendors.	• Ward Council • DSCC	• Social and Economic Insecurity • Limited Business Hour • Bribe to Local Police and Political Leader • Lack of basic facilities like sanitation, accommodation, and food for vendors.	• According to Peña,1999; Kumar,2012; Martínez et al.,2017; Chen et al.,2018; Panwar and Garg,2015; Patela and Grosvald,2021 Licenses and permissions are widely used mechanisms to accommodate street vendors within the public spaces in different cities globally.

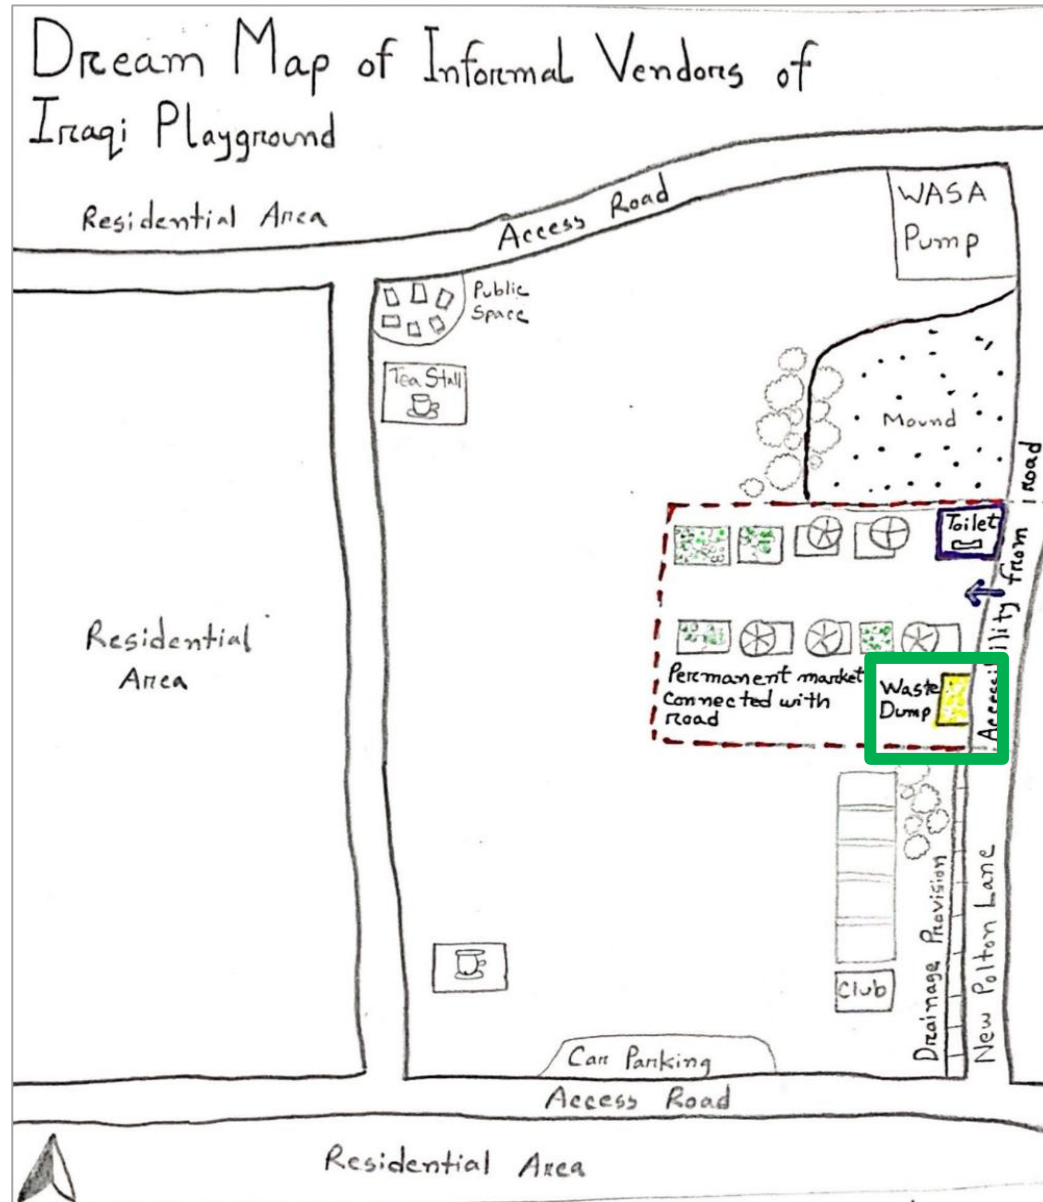

- Apply through a prescribed form with a fixed fee for operating business on Iraqi Playground.
- Validity of license would be ascertained by DSCC
- Annual/Monthly fees charged by DSCC and collected through the vending committee should be nominal or at least affordable for all street vendors. The committees may decide the amount that the street vendors will be charged, considering the local conditions through participatory planning process
- Collected fees would be considered as revenue to government instead of paying bribes to the local police and the municipal corporation.

Recommendation	Relevant Stakeholder	Issues Addressed	Reference of Similar Context
- The municipalities should include basic facilities and infrastructure within the market's spatial arrangement. - Garbage collection and solid waste disposal, toilets and sanitation for vendors, drainage, electricity and water supply, on-site storage facilities, shelter should also be provided where possible.	- DSCC - Ward Council - Local Vending Committee - WASA - Youth Club	- Lack of solid waste management, sanitation facilities, drainage, storage facilities and shelter - Water logging during rainy season - Air pollution due to bad odor - Selling products at cheap rate due to lack of storage facilities - Lack of shelter from adverse weather (Heavy rain) - Disease Outbreak	- District administration should provide vendors with proper shades with minimum facilities such as first aid, drinking water, and toilet (Panwar and Garg,2015) - According to Chen et al.,2018; Kumar,2012; Panwar and Garg,2015; Patela and Grosvald,2021 Urban design innovations need to understand street vendors' basic needs and day-to-day working process to provide alternatives for appropriate infrastructure, storage, sanitation, and shelter facilities in Durban, South Africa; Bhubneshwar, Accra, Bengaluru, Sonipat, Cali, Columbia.

Provision of Infrastructure and Utility Facilities: Aspatial Aspect

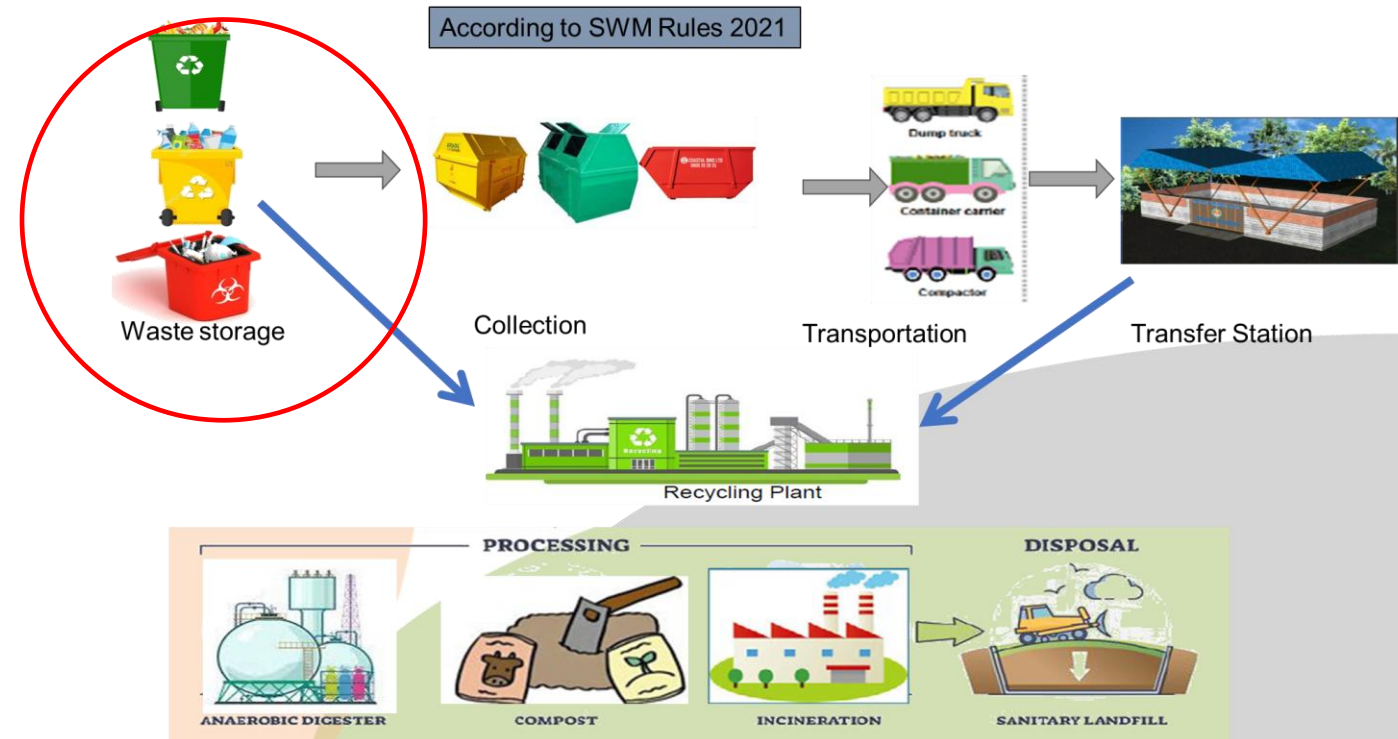

- DSCC can invest a portion of street vendors' contributions (e.g. Monthly fees) into the basic infrastructure. - Institutional strengthening and capacity building initiatives by Ward Council for maintenance of the infrastructure - Monitoring of the facilities provided by authorities by the Vending Committee - A financial scheme under the social safety-net program could be introduced for a specific time frame with a view to assist the street vendors who are below the poverty line and can't contribute. Such scheme should allow the borrowers to repay the loan in several installments.

Spatial: Provision of Waste Collection Bins

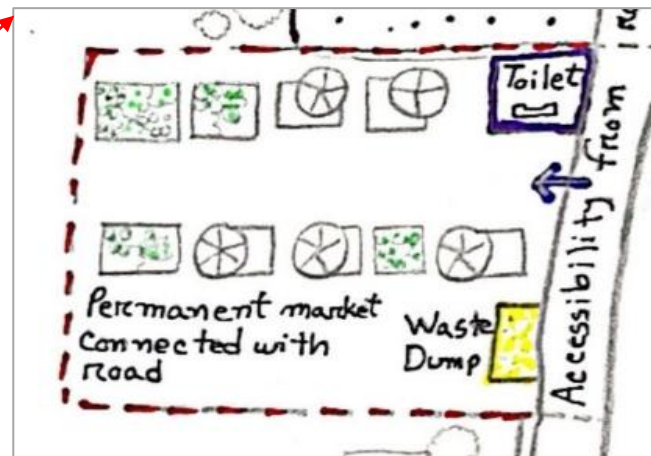

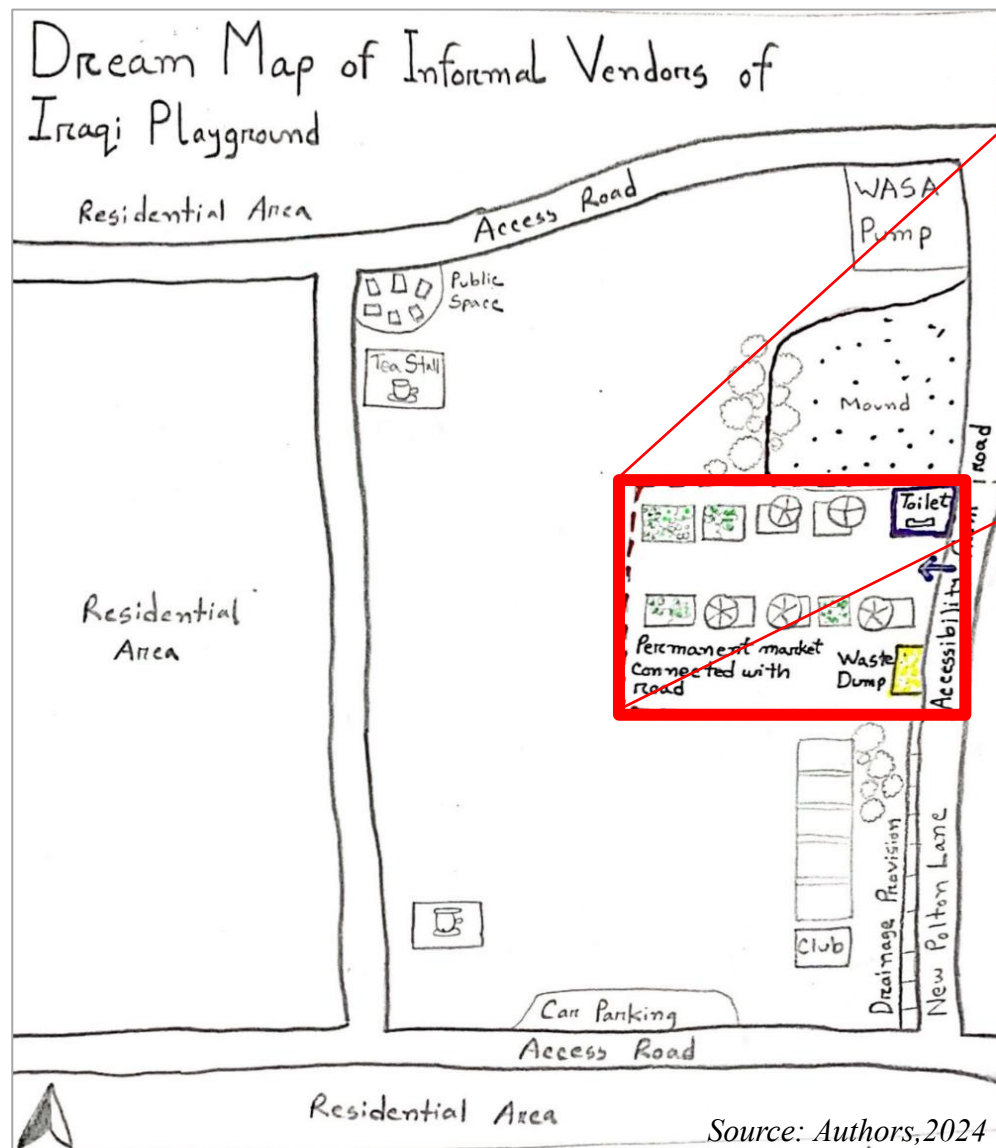

Aspatial: Source Segregation

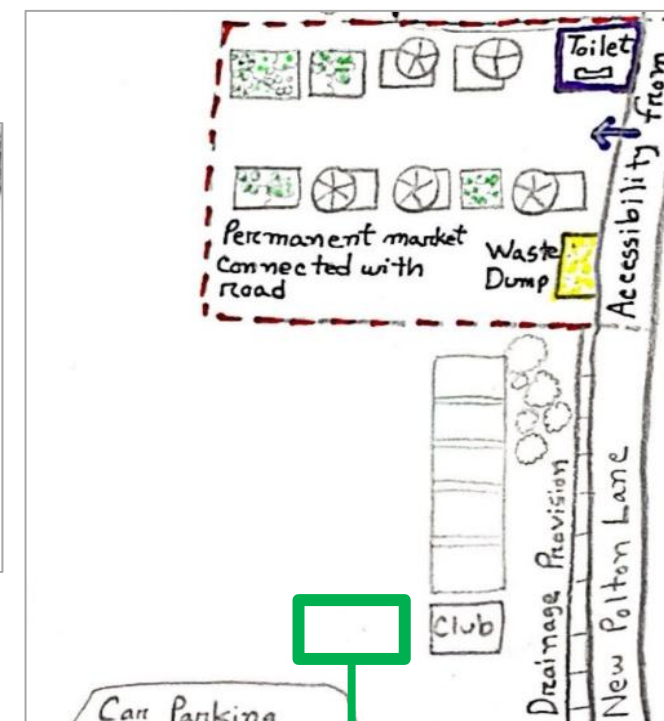

- Three different types of waste bins under the project to store organic, inorganic and mixed wastes separately. The bins would be colored green, yellow and blue. The 3R method called for recycling inorganic wastes like plastic and glass while using organic market waste to produce biogas and organic fertilizer (Islam.2021)
- Community Awareness Program on SWM by Ward Council

Spatial: Provision of Toilet and Handwashing Stations beside the Graveyard Club

Suggestion from Dream Map

Recommendation on Location of Toilet

Aspatial Aspect: Gender Dimension

- Separation between men and women's toilet.
- Toilet's location should be separated from the location of vendors.
- Provision of hand-washing facilities in toilets.

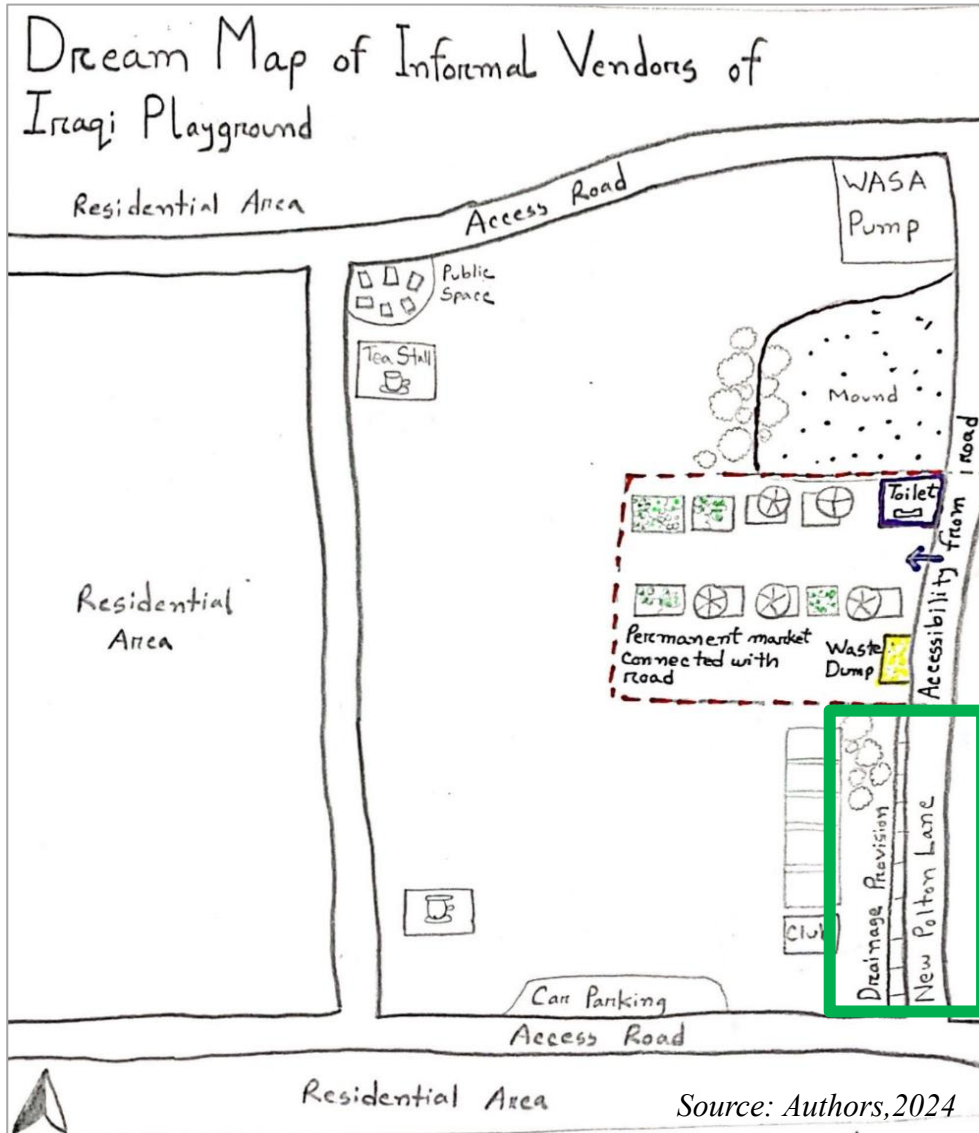

Recommendation	Relevant Stakeholder	Issues Addressed	Reference of Similar Context
- Distribution of umbrellas to fish vendors to protect them from sun and rain. - Distributing carts with shelters to vegetable, fruit and poultry vendors so that they can safely sell and store products.	- UN-Habitat - Youth Club - Vending Committee - Ward Council - DSCC	- Lack of shelter against adverse weather - Disruption in business during heavy rain	UN-Habitat, together with “Pratyasha (Anti-drug Club) ,” distributed 200 umbrellas to protect vendors from the sun and rain along with hand soap, masks, and awareness-building leaflets. Individuals suffering from extreme poverty were also identified and provided with vans to sell vegetables to support their economic situation.

Initiatives taken by Ward Council and aided by UN-Habitat

Source: Block by Block,2024

- **Spatial:** Provision of Drainage Along the New Patan Lane Road

Aspatial: Storage Facilities

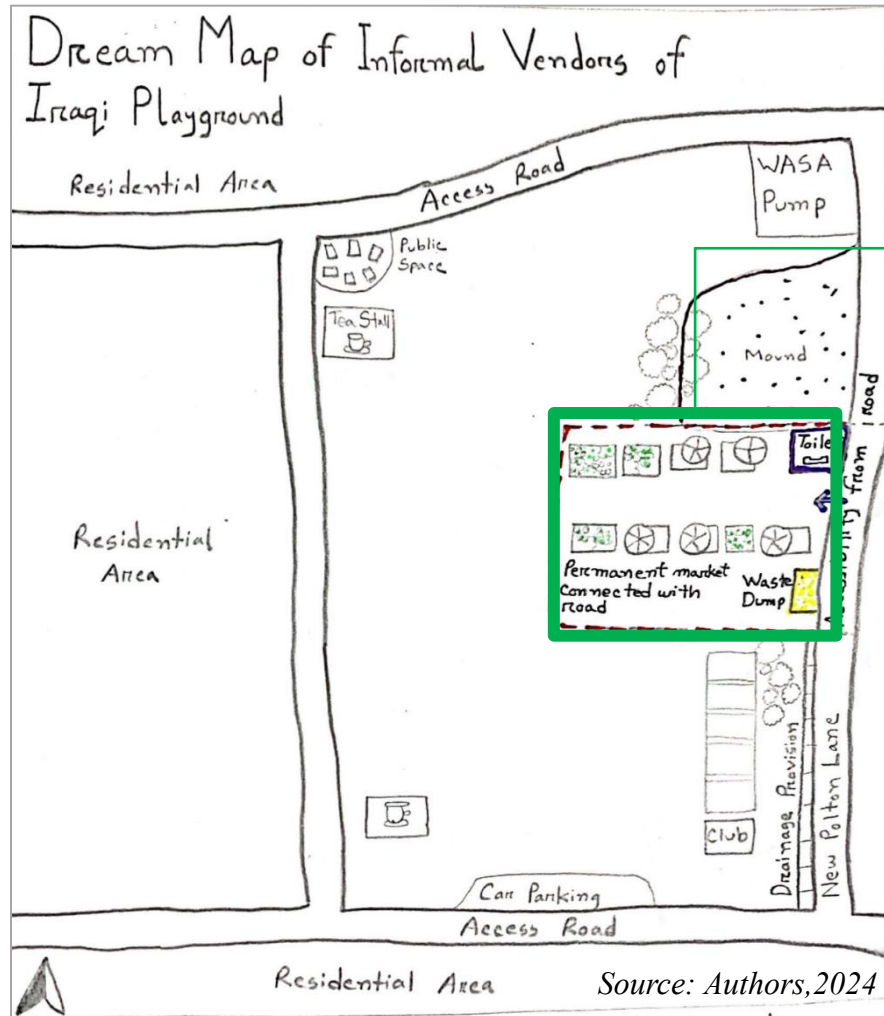

- Units for vegetable and fruit need short term storage and watering facilities. **Perforated packaging for fruits and vegetables** that allows for proper ventilation.
- **Recommendation for fish storage**

Location of Drainage

Recommendation	Relevant Stakeholder	Issues Addressed	Reference of Similar Context
- Identifying areas for vending with no restriction, areas with restrictions with regard to dates, days, and times and incorporating into planning regulations. - Internal zoning should be defined based on perishable and non-perishable items. - Such decisions must incorporate a participatory process that includes key stakeholders.	- Ward Council - DSCC - Vending Committee	- Space Conflict - Relocation to Pilkhana Gate after business hours - Limited Business Hours	- Municipal authorities should provide sufficient and clearly designated spaces zoned for vending, directly in the layout plans of the market area in Bengaluru (Patela and Grosvald,2021) - Setting up local vending committee in each local jurisdiction, zone allocation and regulation in India. - City authorities and the vendor organizations agreed to a model of dedicated vending zones in Bhubneshwar, India (Kumar,2012). - Determining suitable locations for street vendors at several points can be the basis for a street vendor placement policy in Makassar City (Chen et al.,2018)

- Identifying areas for vending with no restriction, areas with restrictions with regard to dates, days, and times and incorporating into planning regulations.

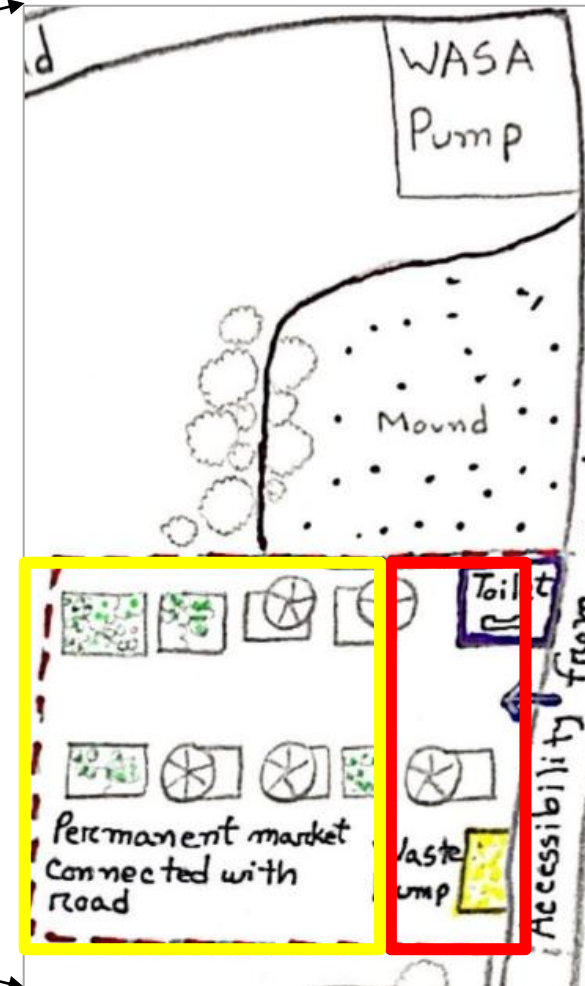

- Ensure that the area for perishable items has easy access to water for cleaning and drainage for waste disposal, especially important for **fish** and **poultry vendors**.

Vending Zone

Fish, Poultry and Meat Vendors

Vegetable, Fruit and Other Vendors

- Perishable item, such as fish, meat is a **wet zone** item where as vegetable and fruit are **semi wet zone** items
- Participatory planning process through accommodating **dream map**

Recommendation	Relevant Stakeholder	Issues Addressed	Reference of Similar Context
• Displaying a price chart in front of each vendor • The price chart should update regularly • The monitoring standing committee of DSCC should be strengthen.	• DSCC (Dhaka South City Corporation) acts as a watchdog in the market to follow the price chart. • Ward Council • Vending Committee	• Price Hike Due To Extortion And During Rainy Season and Ramadan. • Customer Dissatisfaction	• According to the Local Government Act (Amendment), 2011, it is the mandatory function of City Corporation to show the price chart of daily necessities in front of market. Sellers are bound to follow this price chart. It is the right of citizens to bargain with seller to follow this chart.
